Width:

16.000 inches

Length:

14.000 inches

Ac Voltage Rating:

115.0 volts

Frequency Rating:

400.0 hertz

End Application:

C-130

Electrical Power Source Relationship:

Operating

Internal Battery Accommodation:

Not included

Inclosure Feature:

Single item w/carrying case

Test Type For Which Designed:

Tests circuit cards associated with liquid crystal displays of electronic adi's and hsi's

Phase:

Single

Functional Description:

An independent, self-contained, operational and fully portable set used for functionally testing the circuit cards associated with the electronic attitude direction indicator and horizontal situation indicator liquid crystal displays. All circuitry for providing instrumentation stimulus are contained in the test set.
