**End Application:**

Used in cage 23338 p/n 1000-00-0569

**Unit Type:**

Main frame test signal

**Criticality Code Justification:**

Feat

**Special Features:**

20 mhz arbitrary waveform generattr; horizontal memory of 12k; function generator mode: sine, triangle, ramp, square, dc and the inverse of all waveforms; arbitrary generator mode: sin, cos, exp, sin/x and user defined; operational modes: continuous, triggered, gated and burst;

esd

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

T228-b
