Frequency Rating:

Between 1.0 megahertz and 225.0 megahertz

Mounting Method:

Rack

Measurement Type:

Frequency and ratio and time interval

Gate Time:

100.0 microseconds

Sensitivity Rating:

35 mv

Display Type:

Light emitting diode

Display Digit Quantity:

12

Display Positioned Decimal Point:

Provided

Special Features:

Option 10 = high stability oven timebase

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T297-a
