**End Application:**

F-15e rf microwave test set

**Unit Type:**

Timing

**Functional Classification:**

Aa-12.11

**Special Features:**

Mfr name: terminating input/output module; external clock; has highest logic address (last on list); single slot c size vxibus register based module; 32 pins can be programmed to either output (stimulus), record (response), or real time compare; 20 mhz; 5.0v

**Functional Description:**

Used to terminate pattern clock lines

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

T228-b
