End Application:

F-15e rf microwave test set

Unit Type:

Timing

Functional Classification:

Aa-12.11

Special Features:

Mfr name: terminating input/output module; external clock; has highest logic address (last on list); single slot c size vxibus register based module; 32 pins can be programmed to either output (stimulus), record (response), or real time compare; 20 mhz; 5.0v

Functional Description:

Used to terminate pattern clock lines

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-b
