Sweep Circuits:

Included

Generator Driven Feature:

Included

Sweep Circuit Type:

Horizontal and vertical

Single Trigger Sweep Duration:

100.0 milliseconds

Trace Storage Tube:

Included

Extra Long Reference Number:

Datasys 740 op 108, op 112-1, op 121, op 123

Special Features:

Internal thermal plotter; 3.5 inch floppy drive; analysis firmware; scaling firmware; four channel; color monitor; eight bit resolution; sweep frequency range 150.0 megahertz

Reference Number Differentiating Characteristics:

As differentiated by extra long reference number

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T320-g
