Ac Voltage Rating:

Between 115.0 volts and 230.0 volts

Frequency Rating:

48.0 hertz and 66.0 hertz

Frequency Range Rating:

+0.000/+2.000 gigahertz

End Application:

F-15 depot

Special Features:

Modulation analyzer with opt 031 digital rf communications analysis/high resolution 2.5 ghz input (channel c)and opt 001 extended measurement memory (4x); also includes main & window time bases, auto & triggered operation, histograms, and automated measurements

Functional Description:

Characterizes frequency, phase, and time interval vs time; parameters such as peak-to-peak, carrierr freq, & modulation rate on automatic display

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A532p0
