Major Components:

2 advanced power supply testers, p/n ft9002-00; graphics workstation p/n ft90004-00; fileserver workstation p/n ft9003-00; graphics workstation p/nft9005-00; & local area network (lan)

End Application:

An/alm-246; 4920-01-288-6790 automatic airborne weapons system test central

Inclosure Feature:

Multiple item w/housing

Test Type For Which Designed:

Capable of stand alone operations including test, diagnostics, & test program development

Phase:

Single

Functional Description:

Provides capability to test & troubleshoot ac & dc power supplies, power converters, active loads, & cca's from 5 bays of eia 19 inch racks; operating modes include test execution and debut, test development and debut, generation of test program documentation, and activation of system self-test and calibration

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

T228-a
