Overall Length:

13.400 inches

Overall Height:

9.200 inches

Overall Width:

1.200 inches

Unit Type:

Vertical plug-in or bustester module

Special Features:

Original name: bus simulator; single slot, vxibus c size module; three modes of operation: bus controller, bus peripheral of a passive, & listen only bus monitor mode; internal or external user programmable clock up to 1.5 mhz; front panel led indicators; parallel input/output signals; 34-pin idc 3m-type connector for h009-bus interface; 50-pinidc 3m-type connector for parallel i/osignals; smb connector for external clock input

Functional Description:

Designed for control, test, & simulation of the f-15 avionics h009 dual redundant digital multiplexed serial interfaces & protocol

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-b
