Ac Voltage Rating:

Between 105.0 volts and 125.0 volts

Frequency Rating:

Between 47.0 hertz and 420.0 hertz

Major Components:

Transmitter sr920770-10; two cableassy sr920752-10; two antenna assembly sr920751-10; receiver sr920760-10; two antenna supports sr920753-10

End Application:

5411-01-382-5833, milstar shelter, p/n ef920000-10

Electrical Power Source Relationship:

Operating

Internal Battery Accommodation:

Included

Inclosure Feature:

Multiple item w/housing

Test Type For Which Designed:

Insertion loss

Phase:

Single

Special Features:

Portable; operates at 920 mhz withtransmitted power of 2 watts/34 dbm; transmitted signal can be modulated or continuous wave; adjustable modulation frequency from 250hz to 1.6 khz; receiver receives signals attenuated up to 112 db or more; receiver provides adjustable audio tone; antennas have type n female connectors

Functional Description:

Monitors the insertion loss of a shielded volume, monitors integrity, & locates leaks in the shield

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-a
