End Application:

Outside plant

Installation Design:

Bench

Circuit Attachment Method And Quantity:

2 connector, plug, fiber optic

Special Features:

The 942a single mode optical loss test set (smolts) is a 1300-nm unit used to measure end-to-end loss on single mode fiber paths. Loss measurements are shown digitally on the front panel also provides a stabilized 2kHz modulated source that may be used in conjunction with the 935a Isam and the 836a fiber identifier receiver. Two interconnect cables are included: one Lt1a-a multimode and one Is1a-a single mode

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A310a0
