Overall Length:

6.000 inches

Overall Height:

19.000 inches

Overall Width:

21.000 inches

End Application:

Supports repair of anti radiation missile (arm) decoy -- protects radar from missile attack

Special Features:

Test fixture for testing the input/boost assembly outside the system

Reference Data And Literature:

An/tlq-32

Supplementary Features:

Input boost assembly test fixture (load) for 253394-1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A537k0
