Overall Length:

24.000 inches

Overall Height:

22.000 inches

Overall Width:

18.000 inches

End Application:

For use on an/apq-175, dual bans (x & ka) radar set

Installation Design:

Bench

Operation Method:

Current

Special Features:

Requested name magnetron seasoning station; programmed standard seasoning operation for x-band and ka-band magnetrons; storage weight is 70 lbs.

Functional Description:

Drives gas from the magnetron under low duty cycle operation; contains a dummy load for rf energy dissipation and provides interfaces and provisions to manually vary the current and duty cycle

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T228-c
