End Application:

Western spacelift range telemetry instrumentation

Inclosure Feature:

Multiple item w/housing

Test Type For Which Designed:

Measures telemetered frequencies

Special Features:

Requested name telemetry doppler system

Functional Description:

Measures telemetered frequencies w/an accuracy of better than 1×10^{-11} ; critical equipment and digital control and formatting are referenced to an ultrastable 10 mhz oscillator phase-locked to a cesium frequency standard; measured data is formatted and sent via modem as a relative velocity input to the real time solution for the instantaneous impact point

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
