**End Application:**

Western range telemetry instrumentation

**Special Features:**

The telemetry doppler system has the capability of measuring telemetered freqs w/an accuracy of better than  $1 \times 10^{-11}$ . Critical equipment and digital control and formatting are all referenced to an ultrastable 10mhz oscillator phase-locked to a cesium freq std. The measurement data are formatted and sent via a modem as a relative velocity input to the real time solution for the instantaneous impact point

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T228-a
