Ac Voltage Rating:

115.0 volts

End Application:

C-5, c-141, & c-135 acft

Electrical Power Source Relationship:

Operating

Inclosure Feature:

Multiple item w/housing

Test Type For Which Designed:

Functional testing

Phase:

Single

Special Features:

Also known as upgraded fuel savings computer test set; modified by kit 752817-01 which adds 1553 bus couplers, 486 pc, and new self test program

Reference Data And Literature:

T.O. 33d7-3-201-501

Relationship To Similar Equipment:

THIS-IS-UPG-RADE

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T228-a
