Width:

49.000 inches

Depth:

25.500 inches

End Application:

Computer test set an/apq120 for f-4 acft

Inclosure Feature:

Multiple item w/housing

Test Type For Which Designed:

Test and maintenance

Special Features:

C/o elec equipment cabinet with computer logic unit test set (cluts) assembly, power supply control c-10603/apm-420, connector plate assembly, data storage unit 9513053, test computer cp-126 (p) /awm, fixture-cooler hd-1058/apm420, interconnecting box j-3388/awm-80, power supply pp-7284/awm-80, blower, signal data converter cb-3590/apm420, self test panel, top panel assembly

Height:

72.000 inches

Reference Data And Literature:

33d7-61-53-1

Relationship To Similar Equipment:

Modified from 6625-01-040-8538 p/n 979b052g01 with the personal computer memory loader verifier (pcmlv) 6625-01-418-0341 which converts it into the 979b052g02 test station

Supplementary Features:

The pcmlv is mfr at oo-alc and combined with westinghouse equipment it makes up the 979b052g02

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T228-a
