End Application:

AN/M-ST-T1(-V)MI

Power Source:

External

Functional Description:

Linearizes rf signal path in blue/grey transmitters (twt & synthesizer) of electronic warfare training set used on training ranges; a transfer function which will linearize the channel is generated from data & stored in a prom; this test fixture instructs, receives signal data, & initializes the prom, if and when linearization process is required

Supplementary Features:

C/o ep-1 universal prom programmer; pe-140 spectronics uv eraser; ibm pc 80386 or compatible; rs-232 cable; at adapter, terminal emulation program

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
