Overall Length:

5.000 inches

Overall Width:

4.000 inches

End Application:

Used on the 3003951 and 3003949 grid modulator ccas of the an/mst-t (v) , electronic warfare training set

Test Item Connection Method:

Connector and jack

Special Features:

Requested name grid module test fixture

Functional Description:

Used to interface to the optical hardware, converts to electrical for return signal msmt and also electrical signals to optical for input signals where optical inputs are required

Surface Treatment:

Oxide film

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A537k0
