Overall Length:

15.000 inches

Overall Height:

8.000 inches

Overall Width:

8.000 inches

End Application:

F-15 aircraft msogs test stand

Voltage In Volts And Current Type:

115.0 ac

Material:

Aluminum and steel and copper and plastic

Reference Data And Literature:

To 33d2-10-75-1 & 33d2-10-76-1

General Description:

Used to check out molecular sieve oxygen generating system test stands and used in conjunction with 5khz to 100khz function generator. 2 thumbwheelswitches set bcd output signals. Provides +5 & +15vdc for uut

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23900
