**Furnished Items:**

50 ohm cable

**End Application:**

Power supply test station 6625-01-399-1759 dq

**Unit Type:**

Frequency converter

**Special Features:**

Nc1 size; one slot, register based; itg/vee drivers; scpi compatible; six 1 x 4 multiplexers, each can support up to two expanders; smb male connectors; max. 42 v peak; maximum current per channel 1 adc; maximum power 24 va

**Functional Description:**

Switches signals up to 1.3 ghz

**Supplementary Features:**

Radio frequency multiplexer expander; order cable extension kit for remote e1473-80002 and mount expanders next to multiplexer; service manual order opt 0b3

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T228-b
