End Application:

6625-01-399-1759 power supply test station

Unit Type:

Vertical plug-in

Functional Classification:

Aa-12.11

Special Features:

Requested name switch matrix; bandwidth 10 mhz; 8x32 2-wire switching matrix; rows expand to make larger matrixes; latching armature relay; downloadable channel lists into onboard memory for higher system throughput; interchangeable terminal blocks allow changing between three matrix types; c-1 module size

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-b
