Inclosure Material:

Aluminum

Frequency Rating:

Between 26.0 hertz and 30.0 hertz

End Application:

6406838 amplifier; 13a6570-5 radar test station 4920-01-290-2881; f-15 aircraft

Closure:

Included

Channel Quantity:

2

Test Type:

Noise

Amplifier Channel Accommodation:

Multiple

Indicator:

Not included

Functional Description:

Microwave noise analyzer assembly 6406803-3 nsn 6625-01-384-1278 which has been modified with kit to improve test set's accuracy

Supplementary Features:

C/o noise analyzer 6458307-1, slide test drawer 2141972-1; id plate

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-g
