Overall Length:

18.500 inches

Overall Height:

5.250 inches

Overall Width:

19.000 inches

End Application:

Power supply test station, 6625013991759

Criticality Code Justification:

Feat

Component Type And Quantity:

2 plug and 20 relay and 2 transformer and 4 jack

Special Features:

Requested name dc interlock; unit contains 5 mercury relays; dc output r elay contact 50 a; dc output sense relay contact 1 a; current flow through control lines less than 200 milliamps; ac input 120 vac at 3 a max; simplifies the safety interlock mechanism required between the dc sources and operator's test panel; provides independent output relay control of each source; disconnects outputs of the dc sources and their sense lines; t.O. 33a1-3-583-1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
