Overall Length:

8.000 inches

Overall Height:

4.500 inches

Overall Width:

14.000 inches

Functional Description:

Provides electrical interface between interface panel of cass station and unit under test for performance verification, fault detection and fault isolation

Material:

Aluminum body

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A537k0
