End Application:

Used during testing of line replaceable units while utilizing the f-15 ais

Special Features:

Frequency range 200 khz to 40 ghz; power density range 40 db; batteriesbuilt in rechargeable type; full scalereading 0.02, 0.2, 2, 20 mw/cm; power density meter model 495; includes audible alarm when power density exceeds the selected level; 3 operational modesnormal, peak and average; can be operated from 115/230 power source; response time 1.5 second normal or 3 seconds slow; includes battery charger

Functional Description:

Detect and measure potentially hazardous electromagnetic radiation fromrf and microwave sources

Supplementary Features:

Includes probe, power density meter, extension cable, option 309 portable test source, carrying case; manufacturers name: high performance raham radiation hazard meter

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
