Overall Length:

22.200 inches

Overall Height:

7.000 inches

Overall Width:

17.900 inches

Ac Voltage Rating:

100.0 volts and 240.0 volts

Dc Voltage Rating:

Between 1.0 volts and 1000.0 volts

Frequency Rating:

Between 48.0 hertz and 62.0 hertz

End Application:

Elec systems test set apq-180

Unpackaged Unit Weight:

80.000 pounds

Calibration Range Quantity:

6

Phase:

Single

Special Features:

Dc source; designed to be supported by wavetek 4950 multifunction transfer standard; 8-1/2 digit accuracy; true 1 kv ac performance; opt 10 is dc voltage range porm 190 vdc without high voltage and porm 1100 vdc with high voltage; opt 20 is ac voltage range porm 190 vac without high voltage and porm 1100 vac with high voltage; ieee-488 front panel interface

Functional Description:

Performs adjustments and calibration to e1429a/b digitizer and 1270b frequency response analyzer

Relationship To Similar Equipment:

SIMI-LA-RTO-WAVE

Supplementary Features:

2 hr warmup time; operating temp 0 to 50 degrees cel; storage temp minus 40 degrees to plus 70 degrees cel; vacuum flourescent display; safety alarm

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T263-b
