End Application:

Gps-ocs

Unit Type:

Vertical plug-in

Special Features:

Dual rf amplifier; 1-20 mhz; input voltage 1 v rms max; harmonic distortion m 40 dbc max; spurious m 80 dbc max; 2.1 w power; 2 sma female input connectors used for 2 independent inputs; 2 pair sma female connectors used for output; ibm/xt system connectors; isolation better than 120 db at 5 mhz; width 1 slot; front panel installation; failure rate 0.286 failures/10 hours; hp calls this a general purpose distribution amplifier

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-b
