Dc Voltage Rating:

28.0 volts

Accessory Component Quantity:

8

Furnished Items:

2 probe antennas p/n 10-277-1; 4 extension cables 10-1-2-100; 1 remote control set a0663; 1 adjusting tool p /n jh-00-001

End Application:

Hc-130 (n)

System For Which Designed:

Electronic

Accessory Controlling Agency:

Specmat technologies

Phase:

Single

Special Features:

Homing system test set

Functional Description:

Compact, handheld battery operated test set designed to confidence check angular displacement and sensitivity of homing & df equipment/systems; simply select any 1 of 4 distress frequencies am 121.5 mhz, fm 156.8 mhz; uhf243.0 mhz; and new 406.0 mhz frequency band; this unit simulates a beacon transmission at either 0, 22.5, or 45 degrees both left and right; subsidiary test frequencies of 121.5, 156.8, 243 & 406 mhz may also be selected together w/ varying input levels

Unpackaged Unit Weight:

15.00 pounds

Reference Data And Literature:

Serd no 34-9t-0018

Supplementary Features:

5 hour battery life, padded carrying case; probe antenna 5 in long, copper and aluminum material; extension cables are 15 in; approx size 12 in by 8 in wide and 8.3 in high

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
