Overall Length:

13.400 inches

Overall Height:

1.200 inches

Overall Width:

9.200 inches

End Application:

Part of 4920-01-362-9002 radar test station

Unit Type:

Main frame test signal

Criticality Code Justification:

Feat

Special Features:

Oscanning a/d converter, 64-channel; high-speed scanning, 16-bit resolution, high accuracy: 0.01% of reading, 4mv to 16v full-scale input, automatic self-calibration, c-size, 1-slot, 100khz; electrostatic discharge sensitive

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-b
