Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Installation Design:

Rack

Circuit Construction Type:

Solid state

Frequency Per Channel:

9.7 gigahertz output channel

Connection Type And Location:

Receptacle, coaxial front

Operating Ac Frequency In Hertz:

47.0 single voltage and 63.0 single voltage

External Ac Operating Voltage In Volts:

240.0 4th voltage

Phase:

Single

Reference Data And Literature:

T.O.33aa43-18-1

Supplementary Features:

Output freq porm 1ppm; freq staby p10dbm

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A32200
