Width:

19.000 inches

Length:

26.500 inches

Ac Voltage Rating:

115.0 volts

End Application:

Global positioning system-operational control segment, monitor station receiver element

Electrical Power Source Relationship:

Operating

Inclosure Feature:

Single item w/housing

Test Type For Which Designed:

Tests the global positioning system receivers by simulating gps satellite signals & provides interconnection to gpib for host computer control of functions

Operating Test Capability:

Rf output freq l1 1575.42 mhz, l21227.6 mhz; spurious output is 40 db below the unmodulated carrier; rf output power is m30dbm ; rf port output impedance is 50 ohms

Special Features:

Requested name test transmitter; operating functions include: signal output control, frequency control, code & timing control, nav data control

Height:

7.000 inches

Reference Data And Literature:

T.O. 31s1-4-257-1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

T228-a
