**Overall Length:**

17.000 inches

**Overall Height:**

5.250 inches

**Overall Width:**

17.000 inches

**Current Type:**

Ac

**Frequency Rating:**

Between 47.0 hertz and 63.0 hertz

**Case Material:**

Aluminum

**End Application:**

F15e

**Output Impedance Rating:**

75.0 ohms

**Voltage Rating:**

120.0 pounds per hour wet

**Maximum Signal Output:**

Operator control of video and sync levels of up to 3.5v composite video

**Special Features:**

Catalog name rgb color video programmable test pattern generator; horizontal scan rates to 200 khz; 40 factory standard patterns; 16, 777, 216 separate colors available; three preset standard video levels; internal eeprom storage of 99 formats; pixel freq 6.25 to 150 mhz; independent timing

**Functional Description:**

Provides rgb color video, separate video signal channels for the red, green, and blue components of a color display, in an analog signal format

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T320-j
