Terminal Quantity:

1

Terminal Type:

Solder lug

Unit Type:

Encased

Special Features:

Frequency range 100 khz to 4.2 ghz, 50 ohms rf impedance, 30 porm 0.7 millwatt temperture control thermistor bias power, greater 0.5 percent per year calibration factor stability, calibration factor accuracy (rss pct) 0.1 - 10mhz porm 0.80, 10 -4200 mhz porm 0.90, power dependence of calibration factor greater o.1 percent 1 to 10 mw negligible to useful limit, power range 10 uw to 25 mw, resistance at bias 200 ohms, resistance temp, coefficient negative, resistance powrr sensitivi type 13 ohms/mw, operating range plus 12 degrees c to plus 40 degrees c, non operating minus 55 degrees c to plus 75 degrees c, weight 1.5 kg

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T263-k
