**Circuit Construction Type:**

Any acceptable

**Frequency Shift:**

1.0 megahertz

**Special Features:**

Intermediate switch assembly to support the ica measurement and stimulus switching; intermediate dmm switch tree; digital trigger select; path resistance .75 ohms

**Relationship To Similar Equipment:**

Test set subassembly, electrical and electronic test equipment p/n 90000020

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A32200
