Supply Items And Quantities:

89018001-1 power supply 1; 89018011-1 waveform generator 1; 89018015-1 rf interface assembly 1; 890118012-1 power meter 1; 89018017-1 uut interface assembly 1; 89018013-1 volt/ohm meter 1; 9516787 power control panel 1; 89018014-1 freq counter 1; 9516795 computer assembly 1; 9516815 uut interface ii assembly (tim/ceds) 1

Joint Electronics Type Designation System Item Name:

Test set aircraft instrumentation subsystem (ais)

Joint Electronics Type Designation System Item Type Number:

An/asm-69 (v) 1

Functional Classification:

Aa-9.3

Special Features:

Ais/aisi fail/no fail; computer controlled; assembled pod, sru and flightline capability; transmit 1830 mhz or 1840 mhz; receives 1778 mhz or 1788 mhz; crt or printed results; rack or benchtop

Functional Description:

Functional testing of p4a, p4ax, p4am, p4b, p4bx ais pods

Reference Data And Literature:

Dd form 61

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23800
