End Application:

Hp70000 mms modular measurement system; f-15s

Unit Type:

Vertical plug-in

Special Features:

Also known as a radio frequency section or mixer stage frequency

Functional Description:

Broad band input conversion for spectrum analyzers, rf section rf in, 1st local oscillator out; broadband low noise mixer for high dynamic range; all power supplied by mainframe

Supplementary Features:

One slot wide, 47-66 hz; 310 w

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T228-b
