Overall Length:

14.000 inches

Overall Height:

12.000 inches

Overall Width:

5.000 inches

Dc Voltage Rating:

28.0 volts

End Application:

Used with an/gsm-397 electronic test set

Test Item Connection Method:

Jack

Criticality Code Justification:

Feat

Special Features:

Electrostatic discharge sensitive

Material:

Aluminum case

Supplementary Features:

Wthe interface test adapter is an active electronic device providing input and output signal conditioning including attenuation, amplification and filtering; also provides signal mixing, demodulation, image rejection and switching; used to interface the dst with various f-15 lrus in the performance and intermediate level maintenance testing; the ita is capable of self test with fault isolation to the defective sru; rests on the dst (downsized tester) work surface; aluminum enclosure

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A537k0
