General Description:

High efficiency clamp on injection probe for low frequency conducted susceptibility testing; useable frequency range is 10 khz to 100 mhz with an insertion loss of less than 10db between 200 khz and 15 mhz; 125 watts input power rating for 30 min.; 40 mm internal dia.; 127 mm outside dia.; 70 mm ht

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23900
