Overall Length:

21.750 inches

Overall Height:

19.500 inches

Overall Width:

10.500 inches

Dc Voltage Rating:

28.0 volts

End Application:

F-15 avionics

Product Name:

Interface test adapter (ita)

Special Features:

Used with an/gsm-397 test set; the ita rest on the f15 downsized tester (dst) work surface

Functional Description:

An active electronic device which provides signal conditioning, level translation and other interface functions between the uut and the f15 aircraft dst; used to interface the dst with various f15 lrus in the performance of intermediate level maintenance testing; the ita is capable of self test with fault isolation to the defective sru

Material:

Aluminum case

Reference Data And Literature:

T.O. 33d7-50-2211-2

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A537k0
