Overall Length:

84.000 inches

Overall Height:

84.000 inches

Overall Width:

48.000 inches

End Application:

Afsatcom/milstar

Furnished Items And Quantity:

System control assembly 1; system cooling assembly 1; filament power supply 1; ion pump power supply assembly 1; solenoid power supply assembly 1; collector power supply assembly 1; cathode power supply assembly 1; anode power supply assembly 1; cabinet assembly 1

Installation Design:

Cabinet

Criticality Code Justification:

Feat

Special Features:

Electrostatic discharge sensitive; mfgr name traveling wave tube power supply test set; controlled manually or by a customer supplied host computer

Functional Description:

Testing of continuous wave traveling wave tubes

Reference Data And Literature:

T.O. 33d7-6-361-1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:
