**Overall Length:**

84.000 inches

**Overall Height:**

84.000 inches

**Overall Width:**

48.000 inches

**End Application:**

Afsatcom/milstar

**Furnished Items And Quantity:**

System control assembly 1; system cooling assembly 1; filament power supply 1; ion pump power supply assembly 1; solenoid power supply assembly 1; collector power supply assembly 1; cathode power supply assembly 1; anode power supply assembly 1; cabinet assembly 1

**Installation Design:**

Cabinet

**Criticality Code Justification:**

Feat

**Special Features:**

Electrostatic discharge sensitive; mfgr name traveling wave tube power supply test set; controlled manually or by a customer supplied host computer

**Functional Description:**

Testing of continuous wave traveling wave tubes

**Reference Data And Literature:**

T.O. 33d7-6-361-1

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

T228-c
