

View Online at <https://aerobasegroup.com/nsn/6625-01-457-2917>

**Current Type:**

Ac

**Special Features:**

500 mhz bandwidth; sample rates to 2gs/s; 2 input channels; time interval, 2ns glitch, runt, pattern and state triggering; infinite and variable persistence displays; record lengths to 50, 000 points; 8 bit vertical resolution and up to 15 bit resolution with hi-res acquisition mode; vertical accuracy to 1 pct; 25 automatic measurements; 2pf fet probes standard; 100 waveforms per sec update rate; 7 in. Diagonal, magnetic deflection. Horizontal raster-scan; zoom feature allows waveforms to be expanded, compressed and positioned in both vertical and horizontal axes; allows precise comparison and study of fine wave form detail without affecting ongoing acquisitions; zoom provides an effective vertical dynamic range of 1000 divisions or 100 screens

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T320-g
