Product Name:

Oscilloscope 50/60 hz 220v ac

Special Features:

Designed to be used for electric/power electronic measurements which allows the testing and verifying correct operation of motors, checking transformer efficiency, verifying power supply performance, and measuring the effect of neutral current; enables troubleshooting and verification of complicated electronic control circuits controlling high voltage power electronics circuitry; includes: cursors, video trigger with line counter, voltage and resistance measurements, storage of waveforms, data and instrument setups; width 5.5 in., height 10.8 in., depth 2.5 in., weight 4 lbs; operates on a 220 vac, 50/60 h; supplied with the german safety plug on the charger

Supplementary Features:

Is a scope/dmm having isolated channels via the dp120 differential probe for measuring voltages having different ground references in electric/power electronic applications

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T320-g
