Circuit Current For Which Designed:

Ac

End Application:

General purpose support and test equipment, anzac ships, hewlett-packard co

Indicator Type:

Dial w/pointer

Frequency Response Range:

+0.100/+18.000 gigahertz

Scale Marking:

Watts and dbm

Special Features:

Ostyle - rectangular or square; c/o 01-079-9347 and 01-166-9370; power scales 3, 10, 30, 100 mw linear; db scale 20, nonlinear; meter is supplied with 84811 peak power sensor with above ranges; connector type n male

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A310a0
