Product Name:

Digital phosphor oscilloscope

Special Features:

Digital phosphor oscilloscope; 500 mhz bandwidths; sample rates: 2gs/s channel 1, 2gs/s channel 2, 1 gs/s channels 3 and 4; record length: 50k pts; 8-bit vertical resolution, over 11-bits with averaging, and over 13-bits with high resolution; 1 ns peak detection; 1 mv to 10 v/div sensitivity; 1% vertical accuracy; channel deskew +/-25 ns; three dimensions of signal information including amplitude, time and the distribution of amplitude of over time in the form of quantitative intensity information; histograms and normal waveform acquisitions; histogram statistics; limit test; gpib programmability; iomega zip drive compatible; advanced triggering; fft and advanced math; 29 automatic measurements and measurements statistics; standard model

Type/model Designation:

Tds754d

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T320-g
