Width:

400.0 millimeters

Depth:

429.0 millimeters

Inclosure Feature:

Single item w/housing

Special Features:

Functions as spectrum analyzer, oscilloscope, rf and auxillary rf generators, 2 uv receiver, frequency selective rf counter, rf frequency error meter, fm and 0m deviation meter, af frequency counter, am modulation meter, rf power and level meters, distortion meter and sinad meter

Height:

190.0 millimeters

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-a
