Overall Length:

9.000 inches

Overall Height:

9.500 inches

Overall Width:

16.000 inches

Ac Voltage Rating:

Between 100.0 volts and 240.0 volts

Frequency Rating:

Between 40.0 hertz and 400.0 hertz

Frequency Range Rating:

+0.001/+40.000 kilohertz

Unit Type:

Vibration

Special Features:

Single-unit multisspeed, multiplane, multi-sensor; single- pass balancing; automated data acquisition; expandable and upgradeable; microsoft windows; keyboard and mouse bult-in, 2 gb hard drive; balance engine speed 300-100, 000 rpms; mfg name engine vibration and balance analyzer

Functional Description:

Used in testing tf-33 engine on a b-52 aircraft

Supplementary Features:

Frequency ranges full scal in a 1-2-4-5 sequence, 2 to 6 active channels, with a accuracy of pom 0.25%

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A532p0
