Overall Depth:

20.250 inches

Overall Length:

1.750 inches

Overall Width:

7.000 inches

End Application:

4920-01-467-9113so, radar test station

Unit Type:

Power module controller

Criticality Code Justification:

Feat

Special Features:

Voltage input 95 to 264v ac, 47 to 63 hz, 12 watts max; this controller communicates with its host computer over the ieee 488 bus (gpib) using either ciil or scpi for programmable languages, auxiliary input port allows for communication via the rs232-c; this power module controller has the capability to program, control and monitor the outputs of power supplies; can be used in the ra-55 rack adapter; electrostatic discharge sensitive

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:
