**End Application:**

4920-01-467-9113so, radar test station

**Unit Type:**

General purpose relay switching module

**Criticality Code Justification:**

Feat

**Special Features:**

Mfg name surepath relay switching module; this item is a single slot, c size, vxi module containing 64 spdt (form c) relays; maximum switching current 2 amps; maximum voltage 220 vdc / 250 vac; option 01 is vxi interface and slave control daughter board; electrostatic discharge sensitive

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

T228-b
